DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 26 Jan. 2004 has been entered.

Applicant cancelled claims 1-2, 4-5 and 9-12 (amendment filed on 9/15/2003). Therefore ONLY claims 2, 6-8 and 13-15 are still pending.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

A. Claim 6 drawn to a method for repairing a broken portion of gate bus line by forming alternate conductive path through a pixel electrode and source electrode.

B Claim 7 drawn to a method for repairing a broken portion of gate bus line by forming bypass consisting of a conductive path that includes a first edge of the broken gate bus line, source electrode, pixel electrode, first electrically isolated line, second first electrically isolated line and second edge of said broken gate bus line.

C Claim 8 drawn to a method for repairing a broken portion of gate bus line by forming bypass consisting of a conductive path that includes a first edge of the broken

gate bus line, source electrode, pixel electrode, first electrically isolated line, second first electrically isolated line, drain electrode adjacent to second edge of the broken gate bus line and second edge of said broken gate bus line.

D. Claim 13 drawn to a method for repairing a broken portion of gate bus line by making a conductive path that electrically connects the gate bus line to a pixel electrode and capacitor bus line.

E. Claim 14 drawn to a method for repairing a broken portion of gate bus line by making a conductive path that electrically connects the gate bus line to source electrode of TFT and a pixel electrode.

F. Claim 15 drawn to a method for repairing a broken portion of gate bus line by making a conductive path that electrically connects the gate bus line to a pixel electrode and drain bus line.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 2 is generic claim of Species A.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims and any drawings readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HOAN C. NGUYEN whose telephone number is (571) 272-2296. The examiner can normally be reached on MONDAY-THURSDAY:8:00AM-4:30PM.
